

WATERJET PROCESSING™

Professional Cutting - Marking - Etching

PRECISION ABRASIVE WATERJET CUTTING!

CUTTING

- Cut any shape without special tooling cost
- Cut virtually any material
- Material flatness is maintained-*(stress relieving may occur)*

MARKING

- Eliminate manual layout errors by utilizing our marking capabilities
- Center marks
- Placement marks
- Press brake marks

ETCHING/ENGRAVING

- Identification information
- Designs

THE WATERJET ADVANTAGE

Out performs Plasma, Laser and Punching

- Accuracy on plate material
- Minimize cut bevel on thick material
- Variety of materials capability
- Effected heat zone on metals-*(This is a cold cutting process)*
- Material thickness limits
- Hole diameter limits due to material thickness
- No Slag removal needed
